

# Hunting Regulations for the Town of Brewster

## Introduction:

In response to a call for promoting hunting practices and reducing conflict-of-use issues, the Brewster Sportsmen Committee was formed in the autumn of 2008 to help evaluate and update the Town of Brewster's hunting policies. This evaluation process took into account many factors such as parcel size, location, other uses occurring on said parcels and their relationship and proximity to private property and housing. The committee's recommendations observed not only state mandatory setbacks but added extra precautions (such as no hunting within 150 feet of marked walking or hiking trails, primitive arms hunting from tree stand only) in certain areas to enhance public safety and comfort.

The members of this committee included hunters and non-hunters, representatives of the Town of Brewster Police Department, and Natural Resources Department, and a state-certified hunter safety instructor along with life-long residents of Brewster.
