Currently, the PCR Swab Test is the only test accepted by the MA Dept. of Public Health to confirm an active case of COVID-19. The antibody and antigen tests are only effective a minimum 5 days after exposure and requires a PCR Swab Test to confirm an active positive case. The Brewster Health Department recommends the PCR Swab Test for the most accurate results as accepted by DPH guidelines including the MA Mandatory Travel Order effective August 1, 2020.
